About Research Methodology Course

This course is designed to provide M.Phil., Doctoral and Post-Doctoral students of social science discipline with both theoretical and practical knowledge about various research methodologies and statistical tools. The ultimate goal is to equip participants with the skills necessary to apply research approaches in their academic and professional pursuits. This course is ideal for those seeking to gain an understanding of research methods and skills, and for those wishing to apply these skills in their studies or careers.

Brief Content of the Course

The course will be conducted physically and in offline mode at IIT Bhubaneswar campus. In addition to the interactive classroom lectures on research methodology, the participants will also get hands-on experience of data analysis using the statistical software like STATA, E-Views etc. Moreover, participants will have the opportunity to gain familiarity with pertinent library tools, including Turnitin software for detecting plagiarism and reference management software such as Mendeley. The course incorporates a field visit tour, providing participants with a practical opportunity which will enhance their understanding and equip them with necessary skills to undertake research independently in the field of social sciences.

Resource Persons

During the course, participants will have the opportunity to learn from experts who come from IITs, NITs, research institutes, and universities across the country.
